Objective

Results-driven iOS Developer with 4 years of experience at Beetonz Infotech, where I successfully designed, developed, and delivered different iOS applications across multiple domains, including API-driven platforms, utility tools, and camera-based solutions. Currently serving as a Senior iOS Developer and Team Lead, with hands-on experience in mentoring developers, owning end-to-end delivery, and building scalable, high-quality applications. Actively seeking a new opportunity to deepen expertise in advanced iOS development, system architecture, and emerging technologies while taking on impactful technical challenges.

Skills

- Swift programming
- RESTful APIs
- Adaptability
- Generative AI
- iOS development
- Problem solving & Logical reasoning
- Basic Figma Knowledge
- Basic Knowledge in SwiftUI

Work Experience

Beetonz Infotech | Surat, Gujarat

IOS Developer, 02/2022 – Current

- Developed robust, scalable, maintainable, and testable code for various iOS applications.
- Collaborated with cross-functional teams to implement new features and enhance the user experience of existing applications.
- Improved app performance and stability by optimizing code and integrating third-party libraries and APIs.
- Identifying areas for improvement in existing applications, and developing strategies for improving them.
- Mentoring junior developers by providing technical advice and guidance.
- Conducting code reviews, debugging issues, and providing guidance to junior developers.
- Designed and implemented web services using RESTful API for data integration between applications.
- Integrated third-party APIs into existing systems for improved functionalities.

Projects / Applications

Land Area Calculator https://apps.apple.com/us/app/land-distance-area-calculator/id1437869326

- A GPS-based measurement tool that lets users calculate land distances and areas with good accuracy. You place points on a map to measure the distance or area between them, implemented Google Maps SDK

Wallpaper OS 17 https://apps.apple.com/us/app/wallpapers-os-17-dynamic/id6444822284

- Developed and maintained an App Store iOS wallpapers app with live wallpapers, dynamic effects, and customizable lock/home screen backgrounds optimized for iOS 17.

Geotag Map Camera https://apps.apple.com/us/app/geotag-map-camera-gps-camera/id6444712443

- Owned the end-to-end development of Geotag Map Camera – GPS Camera, creating advanced geolocation stamping and live metadata overlay features leveraging CoreLocation, MapKit, camera APIs, and sensor data, enhancing how users capture and preserve context-rich visual memories.

GPS Navigation https://apps.apple.com/us/app/gps-navigation-get-direction/id6444224294

- Built an iOS navigation app providing real-time GPS routing, directions, and nearby place discovery.

Face Swap Video https://apps.apple.com/us/app/face-swap-video-ai-face-swap/id1609194013

- Developed an AI-powered iOS app that enables users to swap faces in videos and photos instantly with realistic results for fun and social content creation.

World Spots View https://apps.apple.com/us/app/world-spots-view/id6755466608

- Developed an iOS app using Mapbox SDK to showcase and explore popular world spots with interactive maps, location markers, and smooth map-based navigation.

Live Football TV: Live Score https://apps.apple.com/us/app/live-football-tv-live-scores/id6499262491

- Developed an iOS app delivering live football scores, match updates, and real-time sports information, with intuitive UI and seamless data presentation

Widget Kit – Date, Time Widget https://apps.apple.com/us/app/widget-kit-date-time-widget/id6477915702

- Developed an iOS app using UIKit and SwiftUI, integrating WidgetKit to provide customizable date and time widgets for home screen personalization.

Education

Government Engineering College, Patan
Bachelor of Engineering in Computer Science & Engineering
2022
